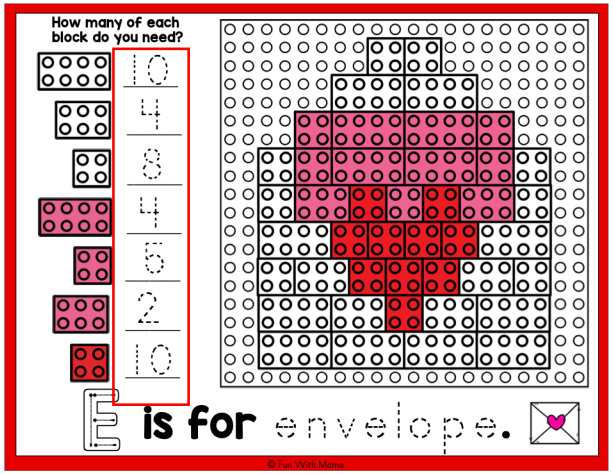
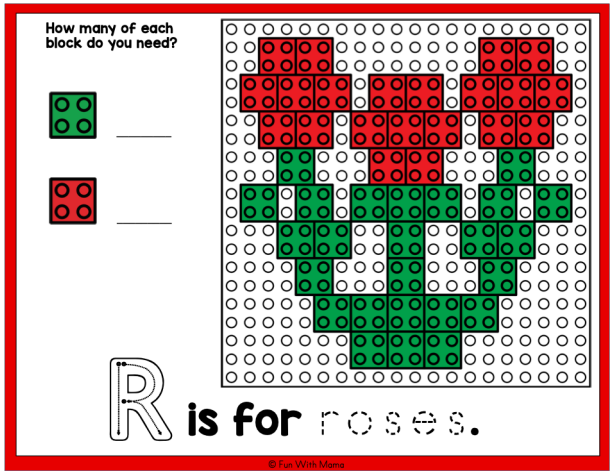
Directions:

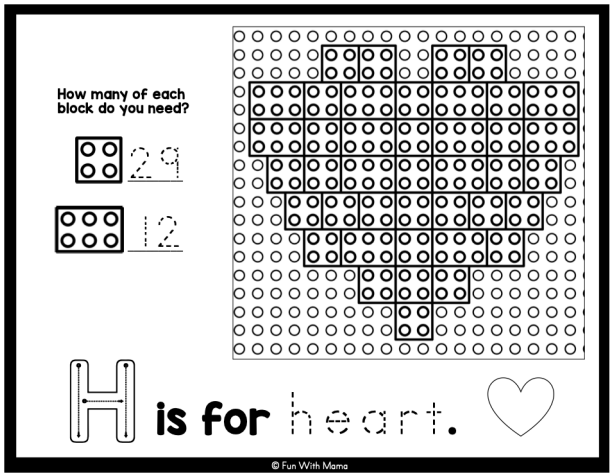
Choose the counting block mat that is most appropriate for your student/class.



This one is more appropriate for younger students. Students can trace the numbers so that they know how many pieces are needed.



This one is a bit more difficult. Students will need to figure out how many pieces they need of each Block.



If you don't have a large block collection, you can Use the black and white version. Students can then use any color blocks.

How many of each block do you need?
